

KTH

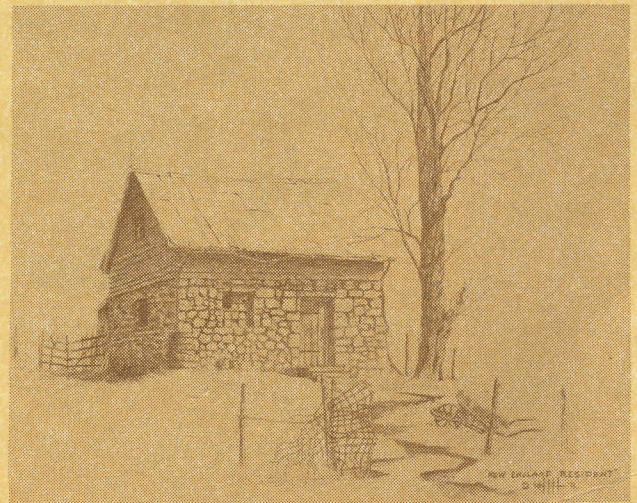

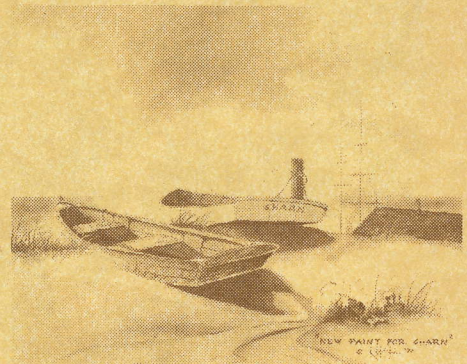

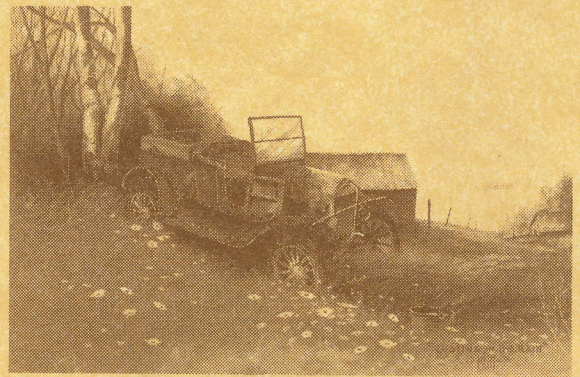

"Magic Realism" best describes the works of art presented by Keith Sluder, a self-taught 29 year old California artist.

Though still a young man, Keith is no newcomer to the field of art and creativity. His background in fact, reflects a wealth of knowledge and experience gained on the drawing boards as a Technical Illustrator for various industrial firms where he learned the fine points of detailing dimensional and schematic sketches and drawings.

Keith the artist, a devoted husband and father of three sons was born in the Smokey Mountains of North Carolina where he learned early in life to recognize and appreciate the beauty and tranquility of the many elements of nature that surrounded him.

Keith now shares with you on canvas, reflections, meaningful and perhaps nostalgic of the little things in life which in themselves can convey so much. An abandoned plow in a now empty field, baskets sitting in the sun, a Ghost Town dusty and forgotten, the enchantment of an old barn or perhaps the loneliness of an old house where . . . no one in particular lived.

THE FLAVOR OF OLD JEROME
